BUILDING PERMITS

JANUARY 1961

Published by Authority of

The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1961.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

BUILDING PERMITS

FEBRUARY 1961

AND

ANNUAL TOTALS, 1960

Published by Authority of

The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

BUILDING PERMITS

1960

(Annuals Totals)

The following summary of building permits provides for over 1,000 municipalities, annual totals of data published during the year, 1960. In addition to information for individual municipalities, totals are provided for metropolitan areas, economic areas in Quebec, Ontario and Manitoba, and for the provinces.

During the year 1960, building permits were issued for over \$2.0 billion of construction work, 14.9 per cent less than in the previous year. New residential construction declined by 24.8 per cent, industrial and commercial construction declined by 4.4 and 15.0 per cent respectively while institutional and government construction increased by 9.8 per cent. Building permits issued declined in all provinces between 1959 and 1960, except in Nova Scotia and Manitoba where gains of 12.1 and 4.0 per cent were made. While commercial building permits declined in total, theatres, arenas and other recreational buildings increased by 16.1 per cent and hotels and motels increased by 21.6 per cent. The gain in institutional building was concentrated in hospital construction which increased from \$56.1 million in 1959 to \$118.1 million in 1960, a gain of 110.5 per cent. Provinces sharing in this increase in hospital construction include Newfoundland, Nova Scotia, Quebec, Ontario, Manitoba and Alberta, with the other provinces continuing at about the same level as in the previous year.

Table 1. Building Permits Issued in Canada, 1954-1960.

Table 2. Building Permits Issued in Canada, 1960, for each province and monthly for Canada.

Table 3. Building Permits Issued in Canada, 1960, by type of structure. The table gives the following detail: Residential - the number and value of new units, units added by conversion and value of repair permits for single dwellings, double dwellings and apartments. Industrial - factories, utilities (1) and other (2). Commercial - stores, warehouses, garages and service stations, office buildings, theatres and arenas (3), hotels and motels, restaurants and other commercial structures. Institutional and Government - schools and seminaries, hospitals, government garages and office buildings, churches, other government buildings (4) and other institutional buildings (5).

- (1) Utilities include buildings for electric, telephone and railway companies, waterworks, broadcasting stations, grain elevators and passenger terminals.
- (2) Other includes construction workshops, oil refineries and greenhouses.
- (3) Theatres and arenas include all recreational buildings.
- (4) Other government buildings include courthouses, gaols, fire and police stations.
- (5) Other institutional buildings include residences, social and welfare buildings, and public halls.

BUILDING PERMITS

MARCH 1961

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

BUILDING PERMITS

APRIL 1961

Published by Authority of

The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

SEE EXPLANATORY NOTES, INSIDE FRONT COVER.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

BUILDING PERMITS

SEPTEMBER 1961

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

SEPT 1961 LATE REPORTS

[illegible]

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining, manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

BUILDING PERMITS

NOVEMBER 1961

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Business Finance Division

6602-506-111

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

Abbreviations used -

SEE EXPLANATORY NOTES INSIDE FRONT COVER

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

BUILDING PERMITS

DECEMBER 1961

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Added to survey in 1961.
- (4) Formerly included in Metropolitan Montreal as L'Abord-a-Plouffe and in Montreal Area as St. Martin.
- (5) Formerly included in Montreal Plains Area.
- (6) Formerly known as St. Joachim de la Pointe Claire.
- (7) Formerly included in Montreal Area.
- (8) Formerly comprised all the municipalities of Metropolitan Winnipeg and the municipalities of East St. Paul, Rosser and West St. Paul, formerly included in the Southeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

NOVEMBER 1961 LATE REPORTS[illegible]

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1962.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

SEE EXPLANATORY NOTES INSIDE FRONT COVER

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada⁽¹⁾ and Private and Public Investment Outlook⁽²⁾ which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

Other includes structures that are not classified elsewhere.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

1961

(Annual Totals)

The following tables provide annual data for building permits issued in over 1,100 municipalities in Canada in 1961. The data provides information for the value of building permits issued annually for: individual municipalities, metropolitan areas, economic areas in Quebec, Ontario and Manitoba and for the provinces.

The building permit survey includes most municipalities in metropolitan areas and most urban centres of over 5,000 in population. The coverage by municipalities has been increased yearly as more municipalities enact building by-laws and begin issuing building permits. The municipalities which do not issue building permits or are not included in the survey are mostly small rural municipalities whose annual volume of permits is very small.

During 1961 building permits were issued for over \$2.2 billion of construction work in Canada. This represents an increase of 10.8 percent over 1960 but 5.7 percent less than in 1959. New residential construction increased 25.3 percent, industrial and commercial construction increased 7.5 and 1.2 percent respectively, while institutional and government construction declined by 6.3 percent from the previous year. The value of building permits increased in all provinces except Manitoba which showed a decline of 8.5 percent. The gain in industrial construction is shown in factories which increased by 15.8 percent while construction in utilities shows a decline of 10.1 percent. While the value of commercial building permits increased in total, stores, warehouses, office buildings and service stations declined by 9.8 percent, theatres, arenas and other recreational buildings increased by 36.1 percent, hotels, motels and restaurants increased by 39.0 percent and other commercial by 50.2 percent. In the Institutional and Government the value of building permits issued shows a decline in school and hospital construction. School construction declined by 5 percent and hospital construction declined by 24.2 percent. Value of building permits issued for religious construction showed a small gain of 3.8 percent, while government construction shows an increase of 16.6 percent.

Table 1. Building Permits Issued in Canada, 1955-1961.

Table 2. Building Permits Issued in Canada, 1961, for each province and monthly for Canada.

Table 3. Building Permits Issued in Canada, 1961, by type of structure. The table gives the following detail: Residential - the number and value of new units, units added by conversion and value of repair permits for single dwellings, double dwellings and apartments. Industrial - factories, utilities(1) and other(2). Commercial - stores, warehouses, garages and service stations, office buildings, theatres and arenas(3), hotels and motels, restaurants and other commercial structures. Institutional and Government - schools and seminaries, hospitals, government garages and office buildings, churches, other government buildings(4) and other institutional buildings (5).

- (1) Utilities include buildings for electric, telephone and railway companies, waterworks, broadcasting stations, grain elevators and passenger terminals.
- (2) Other includes construction workshops, oil refineries and greenhouses.
- (3) Theatres and arenas include all recreational buildings.
- (4) Other government buildings include courthouses, gaols, fire and police stations.
- (5) Other institutional buildings include residences, social and welfare buildings, and public halls.

BUILDING PERMITS

MARCH 1962

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Business Finance Division

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town

SEE EXPLANATORY NOTES INSIDE FRONT COVER

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

SEE EXPLANATORY NOTES INSIDE FRONT COVER

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

APRIL 1962 LATE REPORTS

[illegible]

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

MAY 1962 LATE REPORTS[illegible]

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

BUILDING PERMITS

OCTOBER 1962

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Business Finance Division

December 1962
6602-506

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

Price \$6.00 per year

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works

EXPLANATORY NOTES

The figure "2" after the name of the municipality indicates that the report was not received from the municipality in time for publication. If the figure "2" is not present and all columns are blank, it indicates that a "nil" report was received or that the value of permits issued was less than \$500.

- (3) Formerly included in Niagara Area.
- (4) Formerly included in Upper Grand River Area.
- (5) Formerly included in Metropolitan Area.
- (6) Formerly included in Northeastern Area.

Two monthly tables are shown, a preliminary table for the current month and a revised table for the previous month. The sum of these twelve revised monthly tables will equal the summary for the whole year to be published early in 1963.

Abbreviations used -

C.	- City	Tp.	- Township
C.P.A.	- Community Planning Area	Twp.	- Township
D.	- District	SV.	- Summer Village
M.D.	- Municipal District	V.	- Village
T.	- Town		

Beginning in April, 1962, some minor revisions were made in the classification of non-residential construction. The classification "other" has been discontinued. Non-residential structures are divided into three major groups and are further subdivided into 17 principal categories pertaining to the intended use of the structure in each major group. The minor revisions in the non-residential classification were made to provide a greater degree of relationship between the classification used in building permits and other statistical publications. The table on Page 19 indicates the major groups and the principal categories of each major group.

An additional classification "Conversions" has been added for residential dwelling units in the monthly publication starting in May, 1962. This classification is used to describe the addition of self-contained dwelling units through conversion of existing structures. Dwelling units created by conversions are shown separately in annual publications, and up until May, 1962, were included with new residential units in the monthly publications. This change in residential dwelling units classification will provide more comparable data between building permits and starts for new residential construction.

NOVEMBER 1962 LATE REPORTS

[illegible]

DEFINITIONS

The definitions used in this memorandum are the same as those used by the Dominion Bureau of Statistics in classifying the data contained in Table 27 of the Canadian Statistical Review. These are as follows:

Residential - includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

No. of units shown under Residential housing indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains 6 apartments, it will be shown as 6 dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. The values of the permits issued for such conversions are included with new residential construction. Prior to January, 1957, the values of these permits were included with repair residential construction.

Apartments include all multiple housing with 3 or more units such as triplexes, rows and terraces, as well as apartments. For the years 1951 to 1955 inclusive triplexes were not included in this group. Flats, regardless of number, that are part of a non-residential structure are also included.

Single residential units includes only one unit dwellings.

Double residential units includes all two unit dwellings such as doubles and duplexes. When an existing single unit residential structure is converted into a two unit structure, the unit added is included under double.

Conversions include number of dwelling units added by conversions of existing structures.

New Residential Construction includes the value of building permits issued for entirely new residential work including detached and attached garages. The values of conversion permits are also included in this group.

Repair Residential Construction includes permits issued for major alterations, improvements, and additions as well as smaller types of repair.

This definition of repair is at variance with that used in Construction in Canada(1) and Private and Public Investment Outlook(2) which classify major alterations, improvements and additions as new construction and only those expenditures which return the structure to its previous state, such as painting and pointing of brick work, are considered repair. When this latter category of activity is covered by a building permit, it is included in the total of repair.

Non-residential - building as indicated by building permits contains industrial, commercial, institutional and government building. Permits are issued for some engineering structures such as broadcasting towers, oil refineries, oil tanks, swimming pools and road construction, but the incidence of these structures being covered by a building permit has been relatively rare. The figures include both new and repair construction.

Industrial building includes building permits issued for structures that normally are used in the following industries of the Standard Industrial Classification: agriculture, forestry, fishing, mining manufacturing, construction, transportation, storage, communications and public utilities. Factories are the most common structure.

Commercial building includes building permits issued for structures that fall within the following industries of the Standard Industrial Classification: trade, finance, insurance, real estate and recreation, business and personal service.

Institutional and Government includes expenditures by community, public and government services.

(1) Published by the Dominion Bureau of Statistics.

(2) A joint publication of the Economics Branch of the Department of Trade and Commerce and the Dominion Bureau of Statistics.

CLASSIFICATION OF NON-RESIDENTIAL BUILDINGS AND STRUCTURES

Buildings and structures used for:

Group 4 - Industrial

- 41. Manufacturing - factories, plants, workshops
- 42. Utilities - transportation, communication, hydro, gas and other utilities
- 43. Other industrial - agriculture, forestry, mines, quarries, oil wells

Group 5 - Commercial

- 51. Trade - retail and wholesale stores
- 52. Warehouses and storage
- 53. Motor vehicle service - garages, service stations
- 54. Office buildings
- 55. Recreation - theatres, arenas
- 56. Hotels, motels and restaurants
- 57. Personal services - funeral parlours, beauty salons, barber shops
- 58. Miscellaneous commercial services - heating and plumbing installations, display and temporary buildings

Group 6 - Government and Institutional

- 61. Education - schools, universities
- 62. Medical treatment - hospitals
- 63. Welfare services - home for the aged, incurables, blind, deaf and dumb
- 64. Religious services - churches, synagogues
- 65. Government offices
- 66. Law enforcement - public protection, national defence and public works
